

KISSEN CREATE Walls

Features:

Kissen Create is designed to empower small teams with the creation of agile, collaborative workspaces. Building on the trusted foundation of the Kissen collection—featuring team tables, conference tables, and workstations—Create introduces mobile walls that support both analogue and digital modes of ideation.

Available in two sizes, each mobile wall can be configured with a large-format display, a writeable surface, or a pinnable panel to suit diverse working styles. Smooth-glide castors ensure effortless mobility, allowing teams to adapt their environment on the fly and foster dynamic, creative engagement or create spatial division and privacy.

Options:

- Lockable castors or Glides (*Models vary)
- Available in two widths – 1200W or 1600W
- Camera shelf for digital display only

Design: ZENITH DESIGN STUDIO
